## **Ebricknmortar India Ltd.**

---

### **Projects:**

#### **Ebnmstore.com**

*Duration: Apr 2015 – May 2016 (1 year 1 month)*

Team Size: 6  
Role: Co-Founder & Lead Software Developer  
Environment: ASP.NET Framework 4.5, C#, SQL SERVER 2008, AJAX, EPUB, Digital Reading Tool  
Description: “Electronic brick and mortar” is an online digital store, which gives an essence of brick-and-mortar stores of our society. Our products are customized by keeping in mind of the current market trend. We have categorized our business into two sections i.e. Print and Digital. Our print section includes new and used University books and General books on rental basis. In Digital Section we have eBooks, eMagazine, eComic & eNewspapers.

## **Aurus IT Solution PVT. LTD.**

---

### **Projects:**

#### **1. Unbrako**

*Duration: Feb 2015 – Apr 2015 (3 months)*

Team Size: 2  
Role: Team Leader (Developer)  
Environment: ASP.NET Framework 4.5, C#, SQL SERVER 2008, AJAX, SAP RFC  
Description: The vision of the project is to create an e-commerce website catering to the sales of products from Unbrako brand online and marketed to a B2B audience i.e. Wholesalers / distributors and a retail audience as well. The main challenge in this website is SAP integration.

The project consists admin module where admin can manage, configure products. Admin can insert new product directly to SAP and manage product details accordingly.

## **2. INOX (INOXMOVIES.COM)**

*Duration: Oct 2014 – Feb 2015 (5 months)*

Team Size: 8

Role: Team member (Developer)

Environment: ASP.NET Framework 4.5, C#, SQL SERVER 2008, Third Party Web Service APIs, AJAX

Description: The INOX is one of the big project. I get the chance to work on this project and this is only project in which I face many challenges because there is third party sync (Showbiz) and Payment Gateway (Citrus).

The design of website is truly amazing and clear. The project is design in such a way where people can buy movie tickets, coupons and order food and beverage from website, mobile website and mobile app. This project is developed in three platform Website, Mobile Website and Mobile Apps. The website consists two modules user and admin.

## **3. Bar Stock Exchange**

*Duration: June 2014 – Sep 2014 (4 months)*

Team Size: 1

Role: Team member (Developer)

Environment: ASP.NET, C#, SQL SERVER 2008, Web Service, AJAX, SOCKET

Description: This project is being developed for inhouse organisation (Aurus IT Solution). This project is very special because it is completely SAAS based. BAR STOCK EXCHANGE is mobile application which can run on many platforms.

The concept behind this app is demand and supply which is very simple when demand goes high then price get increase and vice versa. I got the challenge to create the demand and supply algorithm and it was a wonderful experience for me.

## **4. WNS Policy Portal**

*Duration: Jan 2014 – May 2014 (5 months)*

Team Size: 1

Role: Team member (Developer)

Environment: ASP.NET, C#, ADO.NET, SQL SERVER 2008, AJAX

Description: This web application is specifically designed for the company policies for its employees at various departments. This project is mainly hosting on their Intranet which is connected from 11 countries. This web application is very useful to read policy online anytime and tracking was done via LDAP (Active Directory) connectivity. The project consists of mainly two modules like admin and user. The admin module automates entire process of the organization, which help to maintain overall management of policy system. The user module contains the policies according to different country and department wise.

## 5. Eddy Paddy Store (The kids store)

*Duration: Sep 2013 – Dec 2013 (4 months)*

Team Size: 3  
Role: Team member (Developer)  
Environment: ASP.NET, C#, ADO.NET, AJAX, SEO, SQL SERVER 2008  
Description: The project is specially developed and design for kids to download the android kid apps like learning, fun, game apps etc. Apps are categorised in free app, paid app and monthly subscription app. This project consists for three modules are user, developer and admin. The user module is accessible to everyone. The developer module is only for android developer who is interested in sharing the free/paid apps with user. Other feature like user rating, comments, analytics and more. The admin module to manage the overall website.

## 6. Foodhall (By Future Group)

*Duration: July 2013 – Aug 2013 (2 months)*

Team Size: 5  
Role: Team member (Developer)  
Environment: ASP.NET, C#, ADO.NET, AJAX, SEO, SQL SERVER 2008  
Description: The project is being developed for the organization named Future Group. Foodhall – a premium lifestyle food destination. This web site is help customer to get learn cooking by reading articles. In this you can order the food online, learn new cooking style and explore the cooking tricks. This website has faster response time, security and cross browser tested.

## Responsibilities

---

- Interacting with the client to understand the project and finalize its scope.
- Estimation, design and development of various modules.
- Excellent problem-solving skills.
- Knowledge of common design patterns.
- Coordination with in team member and team player.
- Experience with open-source tools & frameworks i.e. Git, NuGet Packages & Modules
- Ensuring smooth delivery of the project.
- Quick learner and should be willing to take up responsibilities.

## Personal Details

---

Date of birth : 26<sup>th</sup> August 1992  
Languages known : English, Hindi, Marathi and Kannada  
Marital Status : Single

## **Activities**

---

- Attended the AWS Summit Mumbai May 2018
- Attended AWS Online Conference Oct 2017

## **Hobbies & Other Interests**

---

- Swimming
- Cycling, Bike Ride
- Travelling & exploring historical places
